Art Unit: 1732

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-16, 20 and 21, drawn to an apparatus, classified in class 425, subclass 453.
- II. Claims 17-19, drawn to a method, classified in class 264, subclass 109.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus can be used to mold compositions other than powders of the group II claims, for example, the apparatus can be used for re-shaping a preformed article.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

5. A telephone call was made to applicant's representative on April 2, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made. Applicant is advised that the reply to this requirement to be

complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
